

Congrats, you did it!

You now know alternate meanings for **fork** and **branch**. You've **collaborated** with someone whose location you're unaware of. You, friend, **pull request** with the best of 'em.

Your pulling and pushing compatriots (give or take 6 million):

About

The **1918** folks on this page have completed **Git-it**, an open source terminal app for learning Git and GitHub.

The **Git-it** challenges are self directed so one can do it on their own, but it also makes for a great **nodeschool.io** type of workshop.

What next?

Don't stop now, keep going! Here are some ideas for what to work on next.

- Make a repository on GitHub named ``ghusername.github.io`` and fill it with web site files -- GitHub will host for free at the same address: `ghusername.github.io`
- Open up an issue in one of your repositories and create a **to-do list**.
- Find interesting open source projects to work with in **Explore**.
- Checkout the GitHub **Hello World Guide** for more GitHub basics.
